PROFESSIONAL SUMMARY

Creating smart software from real-world challenges, turning complex problems into fast, scalable solutions.
Full Stack Developer in **React, Next.js, TypeScript, and Node.js** , architecting backends with **Prisma** and state-driven UIs with **TanStack Query.**
I audit Web Vitals, streamline **CI/CD**, and transform fragile systems into robust engines under high-pressure environments.

EDUCATION

Bachelor of Computer Systems Engineering | Al-Azhar University | *Expected Graduation : January 2027*

PROFESSIONAL EXPERIENCE

Raise the Voices | Full Stack Developer (Full-time) | Aug 2026 - Oct 2026

- Built a full-stack platform with Svelte, Python, and a database, and deployed it on Proxmox servers behind Nginx.
- Diagnosed and fixed the root cause of recurring server crashes in Nginx, stabilizing the live site.

Yoosal | Frontend Developer (Part-time) | Jan 2026 - June 2026

- Translated UI/UX designs into responsive React interfaces and integrated frontend features with backend APIs for seamless end-to-end delivery.
- Owned project testing, cross-team communication, and production deployments to hosting platforms with clean release practices.
- Engineered modular feature connectivity across the application, ensuring organized, scalable frontend architecture .

Linked Trust | Full Stack Engineering (Internship)| Jan 2026 - May 2026

- Built and shipped end-to-end full-stack features in agile cycles with peer reviews, testing, and continuous feedback loops.
- Managed team Git workflows and maintainable architecture across collaborative feature branches.

Gaza Sky Geeks (GSG) | React & Next.js Developer (Advanced Path) | July 2025 - Dec 2025

- Built SEO-optimized Next.js apps with SSR/SSG/ISR, and managed server and global state with TanStack Query and Zustand.

TECHNICAL PROJECTS

Food Nutrition & Queue Management | Full stack | https://gaza-food-project.vercel.app/

- Built a platform to address food distribution challenges in Gaza, featuring real-time queue monitoring to reduce physical waiting times.
- Integrated Supabase (auth) and Prisma (database modeling) for long-term meal tracking, with a dual-language (AR/EN) interface using i18n middleware.

Hospi Link Dashboard | Full stack | https://hospi-link-two.vercel.app/

- Built a full-stack hospital management dashboard (React, Node.js, Express) covering bed allocation, patient admissions, and incident tracking.
- Engineered role-based CRUD modules for real-time record management, backed by a scalable, well-structured API.

Muraqib | Node.js / TypeScript CLI | github.com/Muraqib-Core/muraqib

- Co-developed a CLI toolkit that audits Node.js projects for secrets, vulnerable dependencies, HTTP security headers, Docker misconfigurations, and performance issues.
- Set up GitHub Actions CI/CD with Vitest tests and Git hooks that block commits containing secrets.

TECHNICAL SKILLS

- **Frontend :** React.js · Next.js (App & Pages Router) · TypeScript · JavaScript (ES6+) · Tailwind CSS · CSS Modules · Svelte
- **Backend & Database :** Node.js · Express · Supabase · Prisma ORM · PostgreSQL · RESTful APIs · Python
- **State Management :** TanStack Query (React Query) · Zustand · Redux Toolkit · Context API
- **Performance & Optimization :** Web Performance · Core Web Vitals · Performance Auditing · Benchmarking · SSR · SSG · ISR · SEO
- **DevOps & Tools :** Git/GitHub · CI/CD Pipelines · GitHub Actions · Docker · Nginx · Proxmox · Bash · Vercel · Vitest · CLI Development
